**03/17/2022**

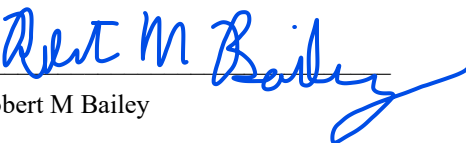

**Final Project: Raspberry Pi: Pi Hole Ad Blocker**

## **Statement of Work**

Development outline: This project will use a database cross referencing ad-providers to block ads on a local network.

Execution: The project will follow an iterative design process, with final delivery set of the system 03/23/2022. the project will be setting up my raspberry pi to act as a local DNS server, in order to block a pre-determined list of ad providers on the local network.
